IP TELEPHONY & VIDEO CONFERENCE SOLUTIONS

ABOUT US

Xtranet is a leading provider of intergrated communications, business and technology solutions. In partnership with global and backbone technology leaders, the company delivers solutions to customers in Broadband Internet, ICT Solutions, Security, Cloud Solutions, Web and Mobile App Development solutions.

We deliver value through a combination of process excellence, quality frameworks and service delivery innovations

WHY CHOOSE US

Unified communications and collaboration (UC&C) brings together the communications tools that people use daily such as voice, e-mail, instant messaging, presence, click-to-dial, conferencing and video into a single interface. UC&C helps overcome the inefficiencies and challenges in organizations where communications previously were fragmented.

Xtranet is at the heart of UC&C with top of the range IP-based and video conference communication solutions.

OUR IP/PABX SOLUTIONS

IP-based communications solutions- An IP-based communications infrastructure is the first step towards transforming how employees, customers, and partners interact in today's contemporary workplace.

How Xtranet Can Help

- Xtranet has relationships with key IP communications vendors key among them Cisco, Avaya, Alcatel, Siemens and Asterisk.
- We have a dedicated networking and communications practice with end-to-end IP communications capabilities.
- Thanks to our multi-vendor status, we can fulfil all your IP communications technology requirements – from peripherals and end points to soft clients and underlying infrastructure components

Video conference solutions- Customer meetings, internal briefings, staff training and corporate announcements no longer require hours of travel or a long lead time. Instead they can be scheduled and completed immediately without anyone having to change their location.

How Xtranet Can Help

- Xtranet has strategic relationships with all the major vendors, including Cisco, Polycom, Microsoft and Huawei
- Our end-to-end expertise means we can address infrastructure, integration and content management issue as part of any implementation
- Our user acceptance testing, training and support services will encourage rapid adoption and enable a faster return on investment
